SQUARE BALER

Square Baler used to compress, cut and rake crop into bales that are easy to handle, store and transport. A baler, most often called a hay baler is a piece of farm machinery used to compress a cut and rake crop (such as hay, cotton, flax straw, salt marsh hay, or silage) into compact bales that are easy to handle, transport, and store. Often, bales are configured to dry and preserve some intrinsic (e.g. the nutritional) value of the plants bundled.
